

Saiti Srabonti Halder, PhD

(347) 449-4245 | 179 Berkeley Ave, Berkeley Heights, NJ 07922 | saitisrabonti@gmail.com

SUMMARY

Healthcare strategy consultant and PhD-trained biomedical engineer with experience driving enterprise and R&D strategy, operating model design, and large-scale transformations across biopharma, MedTech, and life sciences.

EXPERIENCE

BOSTON CONSULTING GROUP (BCG)

Summit, NJ

Consultant

August 2024 - Present

Strategy, Transformation, and Operating Model Design

- Designed a 10-year ESG strategy and Corporate Sustainability Reporting Directive (CSRD) readiness roadmap for a global biopharma organization with no prior EU reporting infrastructure, cataloging regulatory requirements, mapping enterprise data ownership, and establishing governance to institutionalize annual compliance processes.
- Enabled R&D post-merger integration for a large-cap biopharma acquisition by developing budgeting, KPI tracking, portfolio management, and data governance tools, and codifying transformation process in four sub-functional playbooks to standardize integration across Clinical Development and Development Sciences.
- Architected a ~\$1B enterprise value case to support a global digital transformation for a MedTech company operating across 50+ fragmented systems; quantified P&L and balance sheet impact, addressed internal resistance through BU-level alignment, and informed CEO approval of a phased global overhaul.
- Built end-to-end Integrated Business Planning (IBP) capability across 3000+ SKUs for a MedTech manufacturer lacking cross-functional demand and supply coordination by standing up governance, AI-powered demand forecasting, signal enrichment from sales pipelines, and inventory optimization models - improving forecast accuracy by 20% and releasing ~\$30M in working capital.

LUMANITY (formerly Cello Health)

Florham Park, NJ

Associate Consultant Intern

May 2022 – August 2022

- Conducted 10+ opportunity assessments, indication prioritization, and competitive landscape assessments for biotech and mid-size pharma clients
- Interviewed 40+ physicians across vision, cardiology, oncology and dermatology to evaluate TPP and understand treatment algorithm in various healthcare settings

EDUCATION

YALE UNIVERSITY

New Haven, CT

PhD, MPhil, MS (Biomedical Engineering)

May 2024, May 2022, Jan 2021

Dissertation: Identifying mechanisms of pathogenicity in familial cardiomyopathy-linked alpha-tropomyosin mutations

Leadership positions held: GradSWE, Communications Chair; Yale Chitragada, Director; McDougal Center, Fellow

COLUMBIA UNIVERSITY

New York, NY

BS (Biomedical Engineering)

May 2019

C. Prescott Davis Scholar (\$320,000 scholarship awarded to top undergraduate engineering students)

Leadership positions: Academic representative, Activities Board; President, Columbia Taal

SKILLS & INTERESTS

Tools: Programming (Python, MATLAB), Quant (Tableau, Alteryx), Survey (Verint, IncQuery), Microsoft Suite

Skills: Experimental design, NGS techniques, Survey design, Operating Model Design, Transformation Management, Organizational Design

Interests: Painting, Indian classical dance, Bengali literature
